Details about the study

Research:

Analysis of Work from Home and Working Capabilities of employees in Philippine Government Sector.

Introduction:

In recent years, remote work has become an integral part of the modern workplace, driven by advancements in technology and the need for flexible work arrangements. Government employees, like their private-sector counterparts, have increasingly transitioned to remote work settings. This transition has not only changed the way government agencies operate but has also brought to the forefront numerous challenges and opportunities. Recognizing the importance of assessing the performance capability of government employees working from home, we are conducting this survey to gain a comprehensive understanding on factors that may affect Government employees capability to perform task remotely.

Survey Purpose:

The purpose of this survey is to obtain a comprehensive understanding of the experiences employees have regarding various aspects of their work environment, job capability, communication, competency level relative to their current job responsibilities, and to clearly identify factors that affect individuals' capability to perform tasks remotely. The survey will only focus on individual factors that may affect employees' task completion and will not include external factors. By collecting this data, we aim to identify strengths and weaknesses of the work-from-home arrangement for the government agency and develop firm recommendations based on this research to address any concerns raised in relation to this matter."
